Winter Driving Basics

Is the trip necessary?
When storms occur, rethink your travel plans; allow more time if you must go.

First storms of the season
Be overly cautious during the first storms of the season as many drivers forget how to drive in snow and ice.

Drive Cautiously!
Reduce Your Speed: Essential to maintaining control of your vehicle.

Decelerate and Accelerate Slowly

Increase Your Following Distance: Stopping on ice or snow takes considerably more distance.

Position Yourself away from others in adjacent lanes to prevent a collision if you or the other driver loses control.

Focus: No distractions.

Visibility is critical
Remove snow and ice from vehicle surfaces, windshield, windows and lights. Re-check at each stop.

Caution
Bridge surfaces freeze sooner than road surfaces.

Maintain proper following distance
Following too close can lead to hard braking and loss of control on ice and snow.

Be prepared for emergencies

Intersections
- Anticipate lights changing
- Start slowing early and gradually
- Ensure cross traffic has come to a complete stop before proceeding through an intersection
