

Keeping your vehicle fleet safer.

At Nationwide®, we're committed to providing your business with effective and innovative ways to help manage risk. That's why we're proud to work with Lytx® to offer you their DriveCam® safety program. This state-of-the-art solution can help your business improve driver safety and reduce costs associated with collisions and claims.

How the program works.

By providing video accounts and analysis of hazardous driving events, Lytx's fleet management technology can help change driver behavior. Here's how the Lytx DriveCam® program works:

- When a risky driving event occurs, such as hard braking or sudden acceleration, the recorder is activated to capture 12 seconds of video and audio, inside and outside the vehicle.
- The recording is then uploaded wirelessly to be analyzed by Lytx safety professionals.
- Lytx's findings are posted to your online portal for you to review and coach your driver.

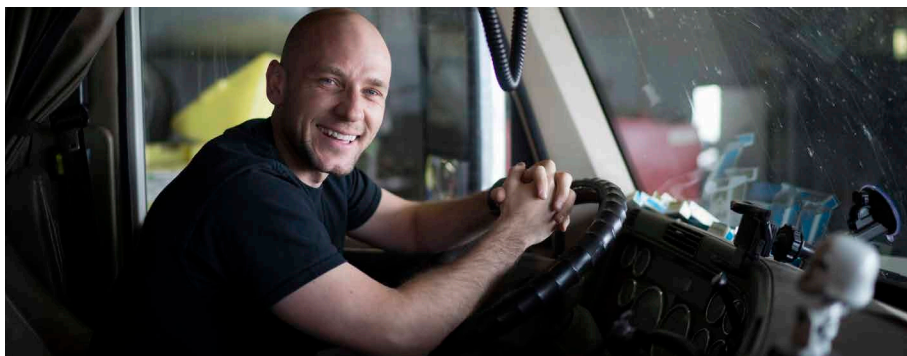

Your Nationwide connection may help you save.

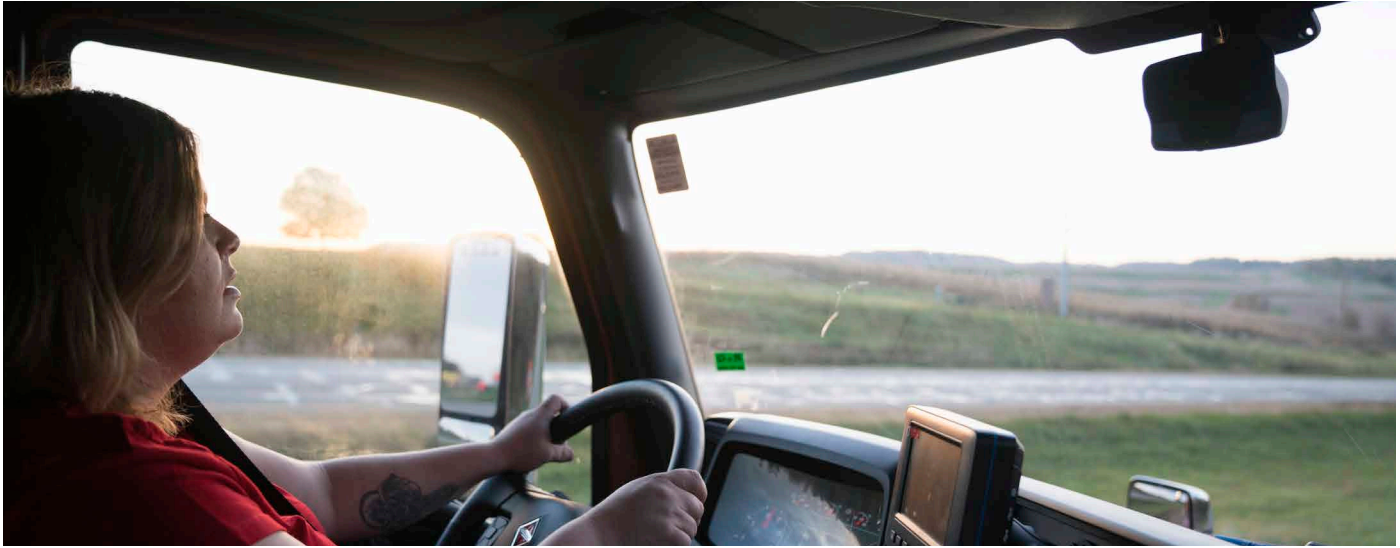

Because you're a Nationwide customer, you may qualify for preferred pricing and promotional offerings when purchasing the Lytx DriveCam® safety program. Discounts are based on the program type, fleet size, length of contract and other factors. Your Lytx Nationwide Insurance account team (see below) can provide you with details.

If you're ready to learn more about how DriveCam technology can help your commercial fleet program, visit lytx.com/nationwideinsurance or contact the Lytx Nationwide Insurance account team at **1-844-582-2886** or channelsales@lytx.com.

Lytx can help your business improve driver safety with their state-of-the-art DriveCam solution.

Benefits your business might see.

With the DriveCam safety program, you can help your business:

- **Reduce claims and protect innocent drivers.** The video-based safety program is proven to help prevent collisions and reduce claims costs by up to 80%². It can also help protect drivers and organizations from false claims.
- **Lower operating costs.** Safe driving helps prevent collisions and related costs, lower insurance premiums, and increase productivity and fuel efficiency.
- **Increase fleet uptime.** Safer, more efficient drivers help reduce vehicle downtime, maintenance and repairs – and improve fleet uptime and revenues.
- **Improve driver performance.** Fleets with safe, skilled drivers perform best. Even the most experienced drivers can fine-tune their skills, and you can reward them in return.

² Based on a select sampling of Lytx client data.

Video telematics can help you pinpoint possible causes of collisions and fight off false claims.
