

A solution for securing your jobsites and equipment.

Nationwide® is pleased to introduce you to **Tattletale Portable Alarm Systems, Inc. (tattletale®)**, the world's first portable, digital and cellular security system with high performance wireless sensors. Many of the nation's largest construction companies use tattletale to protect their jobsites and equipment. Now, that same technology is available at discounted pricing to your Nationwide-insured business.

The benefits to your business.

Using a tattletale portable alarm system, you can:

- Protect against intruders intending to damage or steal your property
- Safeguard your employees, guests and visitors on your premises
- Protect your interests no matter your property's location
- Further customize your system to cover any additional areas as a jobsite expands
- Control your system from your computer or smartphone, from which you can arm/disarm your tattletale unit from anywhere, check the status of your system, and view your event history
- Help manage the amount you spend annually on insurance premiums and out-of-pocket costs

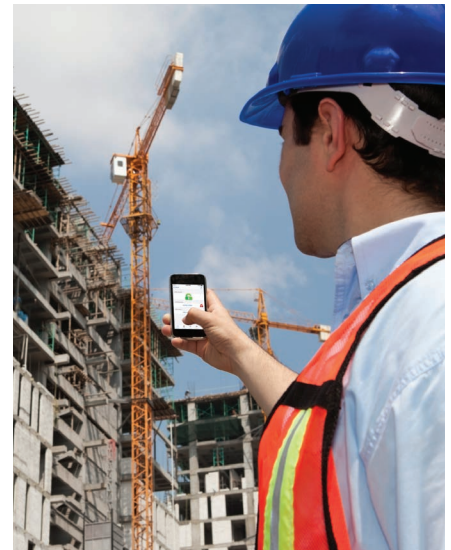

How your connection to Nationwide helps you save.

A cost-effective alarm system program has been created by tattletale (tattletale.com) exclusively for businesses insured by Nationwide companies. Compare these costs for tattletale's Commercial Base Unit.

Regular pricing
\$899

Nationwide pricing
\$675

If you're ready to protect your jobsite with a tattletale system, call tattletale today at **1-888-TELL-ON-U** (1-888-835-5668).

With a state-of-the-art tattletale system (Commercial Base Unit pictured below), you can control your system from your computer or smartphone, giving you the ability to arm/disarm your tattletale unit from anywhere.

Why so many businesses choose tattletale.

With tattletale, you get a completely portable alarm system, in a box. With no phone lines to cut, this cellular and tamper-resistant unit gives you instant protection. Here's a quick summary of system features:

- **Instant cell burst** — Patented cell burst technology works on the Verizon digital cellular network.
- **Built-in motion detection** — The infrared motion sensor on the front of each device won't miss a single intrusion.
- **Siren and strobe deterrents** — These warn intruders and eliminate threats when the system is alarmed, alerting anyone within earshot or eyesight that authorities are already on their way.
- **Tamper-resistant design** — Patented Rattlesnake Technology ensures your tattletale system cannot be moved, repositioned or tampered with when it is armed.
- **10-hour back-up battery** — tattletale's fully chargeable back-up battery keeps the system on, even at times when your main power supply goes off.
- **Halo technology** — Sensors can be placed up to 2,000 feet away from the base unit, providing perimeter protection that communicates through walls.
- **Central station monitoring** — In case of an alarm event, an operator will call your specified list of contacts, and can dispatch police and fire officials to your premises.

Which tattletale sensors are best-suited to your business?

While tattletale offers a wide variety of sensors (such as those pictured below), you can have a fully integrated system with just the **Commercial Base Unit**, pictured on page 1 of this flyer. Once you provide basic information about your jobsite(s) to your tattletale sales representative, he or she will generate a custom quote for your business.

Outdoor Motion Detector
(Detects moving heat in area of up to 40 feet)

Borderguard Sensor
(Ideal for protecting perimeter of building or fence)
